

Description

The JLR1117E is a low-dropout three-terminal regulator with 1.0A output current ability, and the dropout voltage is specified at typical 1.1V at 1.0A current load decreasing at lower load currents.

The JLR1117E is optimized for low voltage where transient response and minimum input voltage are critical. It provides current limit and thermal shutdown protection solutions. Its circuit includes a trimmed band gap reference to assure output voltage accuracy to be within ±1%. On-chip thermal shutdown provides protection against a combination of high current and ambient temperature that would create excessive junction temperature.

The JLR1117E is available in 1.2V, 1.5V, 1.8V, 2.5V, 3.3V, and 5.0V fixed-output voltage versions and ADJ output voltage version. The fixed versions integrate the adjust resistors.

The JLR1117E is available in the industry-standard SOT-223 , TO-252-2L package.

Applications

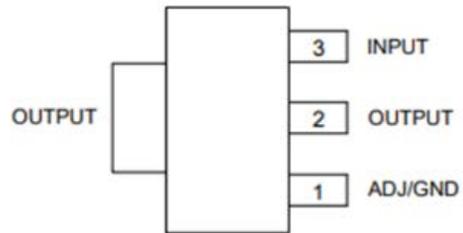

- TVs and LCD Monitors
- PC Peripherals: Notebooks, Motherboards
- STB

Features and Benefits

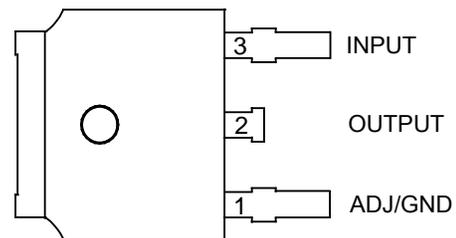

- Provides ADJ Version (VREF = 1.25V) and Fixed Voltage 1.2V, 1.5V, 1.8V, 2.5V, 3.3V, and 5.0V with Accuracy ±1%
- Current Limit: 1.3A (Typ.)
- Dropout Voltage: 1.1V (Typ.) @ IOUT = 1A
- Regulator Stable with Low ESR MLCC
- Excellent Line Regulation: 0.001%/V (Typ.) @ IOUT = 30mA
- Excellent Load Regulation: 0.2%/A @ IOUT = 1A
- Quiescent Current: 3.5mA
- Low Output Noise
- PSRR: 70dB
- OTSD Protection
- Operation Junction Temperature: -40°C to +125°C
- Totally Lead-Free & Fully RoHS Compliant

Typical Applications Circuit

Fig. 1: Application Circuits

Notes: The JLR1117E is designed to work well with MLCC capacitors of low ESR. While input and output capacitors with values of $\geq 1.0\mu\text{F}$ are recommended, ESR of the output capacitor must be $< 1.5\Omega$. Whenever a capacitor is populated near pin 2 (OUTPUT) of JLR1117E and in parallel to the output capacitor, its capacitance must be $< 0.68\mu\text{F}$. In the case that this capacitor is as small as $0.1\mu\text{F}$, it must be positioned $\geq 5\text{mm}$ away from pin 2.

Absolute Maximum Ratings ^{*1}

Symbol	Parameter	Rating		Unit
V_{IN}	Power Supply Voltage	16		V
T_J	Operating Junction Temperature Range	+150		°C
T_{STG}	Storage Temperature Range	-65 to +150		°C
T_{LEAD}	Lead Temperature (Soldering, 10sec)	+260		°C
Θ_{JA}	Thermal Resistance (Junction to Ambient)	SOT-223	65	°C/W
		TO-252-2L	—	
—	ESD (Machine Model)	200		V
—	ESD (Human Body Model)	2000		V

Note *1: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. While these are stress ratings only, functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" are not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.
